

2015 is the year of hygiene and health for DrySec™!

The first and only  
urinal wipe-dispenser  
worldwide

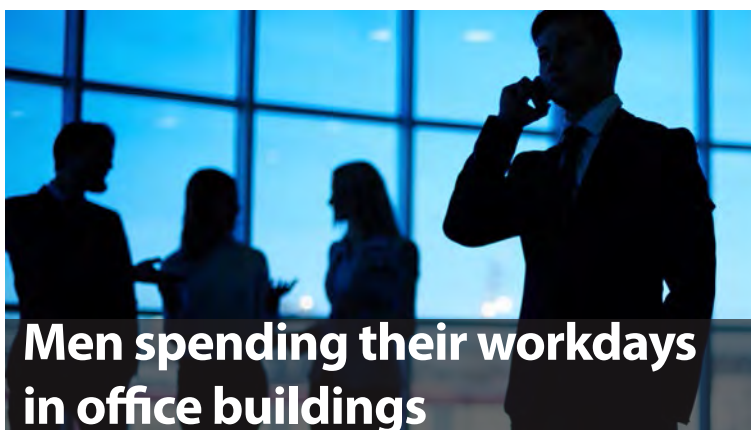

**There are a thousand reasons**  
why DrySec™ started off from hotel and restaurant washrooms on a worldwide journey.

This time we would like to focus on an aspect a little bit different from leisure, tourism and having a carefree time altogether. Body hygiene, health and cleanliness are important in other areas as well.

Hospitals and doctors' offices are the cathedrals of human hygiene and health, therefore nobody values their guests' – in this case: patients' – hygiene more than them. At government run establishments financial efficiency also raises a day-to-day problem. DrySec™ offers a solution for both issues: provides the opportunity for a higher state of cleanliness and saves water at the same time.

Additionally DrySec™ can show its versatility in healthcare, not limiting its use to men's washrooms. Usage of wipes in these establishments is enormous, and although DrySec™ doesn't replace disinfecting, it does great service in areas where there is wiping needed, where you have only one hand to reach for a piece of paper in laboratories, dentists, carehomes etc. Of course the original function in men's washrooms could easily achieve added value by itself.

**Men spending their workdays in office buildings**

are even more sensitive to personal hygiene than the average. The day-to-day same environment is basically a second home where comfort is a priority. DrySec™ can lend a helping piece of paper multiple times a day reaching a comfort-level that will make employees satisfied and more efficient.

Have a question or need more information about our product?  
**CONTACT US!**

**Public and governmental offices should think about DrySec™ as a must!**

Besides dealing with a widespread and huge volume clientele who they have to service in every way possible, they also have an obligation to inform and educate. Installing DrySec™ can be a trendsetting and positive move.

*Dormitories are a really overlooked area of potential sales.*

**Do not make the mistake of underestimating youth!**

They are the generation with the highest needs regarding hygiene these days. They are open to new solutions and welcome every opportunity to step-up their self-grooming. Furthermore dorms and their facilities (sport centers, cafeterias, lounges etc.) can take up a big number of DrySec™-s making them an ideal target group.

**DRYSEC™ STANDS ITS GROUND IN EVERY AREA WHERE MEN USE PUBLIC WASHROOMS.**

Have any doubts?  
Try taking away the opportunity to wipe from women in all these washrooms!  
You would be soon on the run from an outraged group of ladies, guaranteed!  
Why would men be different?

**DRYSEC™ TAKES EQUAL RIGHTS FOR MEN INTO THE WASHROOM!**

*One-time offer:*

We would like to contribute to your business success in 2015 by **PRESENTING YOU WITH A 25% DISCOUNT** on all DrySec™ dispensers installed in **HEALTHCARE INSTITUTES, OFFICE BUILDINGS, EDUCATION ESTABLISHMENTS, GOVERNMENTAL AND PUBLIC OFFICES.**  
*(Discount applies for Ceramic White DrySec™-s, does not apply for paper refills).*
