

SERIOUS DROUGHT  
HELP SAVE WATER

## Dear Friend!

**Cameron Diaz and Sharon Osborne  
have confessed that neither  
of them flush the toilet**  
– unless it is a number two...

This was the breaking news right after Edmund G. Brown, Governor of California issued executive orders on statewide mandatory water reductions.

DRY SEC

**The first and only  
urinal wipe-dispenser  
worldwide**

Would you have thought last November, at the ISSA InterClean in Orlando that the interesting new "thing" DrySec™ would make a comeback in your professional life so soon?

Did we emphasize strongly enough then and there that in washrooms equipped with DrySec™ you can gradually eliminate the use of flush toilets for urinating?

Governor Brown aims to reduce water usage by 25 % across California. This savings amounts to approximately 1.5 million acre-feet of water over the next nine months, or nearly as much as is currently in Lake Oroville.

**How much can you save by implementing DrySec™ fulfilling the need for men to wipe?**

Using the urinal instead of the flush toilet reduces water usage from 5 gallons to 0.25 gallons!

**That means a saving of 95%!**

**AND ADD THE 95% WATER SAVINGS.**

Looking at the situation from Europe, the problem seems a bit more serious than people telling us about it at the trade show in Orlando.

**What do you think: will the mandatory reductions result in an increase or decrease in water and sewage costs?**

Now, we will supply you with a little plaque that can be put on the flush toilet doors made specially for the situation is California which reads:

**PLEASE USE THE URINALS  
FOR URINATING**  
YOU WILL FIND PAPER  
TO WIPE AND SAVE 4.5 GAL.!

Furthermore we will do our part with giving you a **15%** discount on every DrySec™ dispenser and the first box of paper refills. The discount applies to all orders coming in till June 10th 2015.
